

PWR_FLAGS: this rail has no power_out pin anywhere on it, so ERC cannot see what drives it. The flag says a source is off-sheet.
L101: a regulator drives does not see one
UNO Q: no2812 rev B: Board is based on Arduino's UNO Media Carrier ASX00003 so arduino-linux-config camera-hat-type-2: latest version, 10 pack => 5 mOhm shunt => AD6407-PTC F2 => TPS61088 1.1 V -> IMEDIA 97.25 VIN UNO Q's own buck). PTC F1 -> TPS62923 3.3 V -> amplifier chip: IMEDIA 54.256 gain: interrupts on 3.3 V MCU pin, 22.777 Hz, and when the servo pull-ups off +3V3. One 3.3 V I/O bus (C10) carries camera 0x10, expander 0x2B, 0x29, IMEDIA 0x40, head IMU 0x68 and, on J12, the trunk IMU 0x6A.
